Project Report (Task - 2)

Name : Kondapathri Sudhan
Reg no : 25MIM10051

"I have started using platforms like GitHub, LinkedIn, and Kaggle to build my technical skills and professional presence. GitHub is mainly used for storing, managing, and sharing code. It helps me track my projects, collaborate with others, and showcase my work to recruiters."

LinkedIn is a professional networking platform where I can connect with industry experts, follow companies, and stay updated with career opportunities. It also allows me to present my skills, achievements, and certifications in a structured way.

Kaggle is a platform for data science and machine learning, where I can practice with real-world datasets, participate in competitions, and learn from other users' solutions.

Over the next four years, I plan to actively use GitHub to build a strong portfolio with diverse projects. On LinkedIn, I aim to grow my network and share my learning journey regularly.

On Kaggle, I will improve my analytical and problem-solving skills by participating in competitions and completing datasets. Together, these platforms will help me become industry-ready and enhance my career opportunities.

Thank You
